1 Financial settlements

1.1 Partner payouts, transfers

SimplePay Plc. undertakes to ensure:

- that the data associated with the transactions carried out during the settlement period will be provided to the partner in an electronic format,
- that the amount of transactions for the settlement period deducted with commission will be safeguarded on a depositary basis in the SimplePay account designated for this purpose under the Individual Agreement with the partner,
- the settlement of transactions conducted via the SimplePay system and their transfer to the partner after the end of the settlement period.

The frequency and time schedule of payouts are set in the Individual Contract. Partner payouts may only be made on bank business days. If the payment is due on a public holiday, the payout will be carried out on the following business day.

In each case, the partner payouts are supported by a detailed electronic statement of transactions (analytics) identified by the same ID (name) as the one indicated in the notice accompanying the transfer to the partner.

1.2 Statements of transactions, settlement reports

The statement of transactions (settlement reports) are analytics automatically compiled by the SimplePay system, which contains data on transactions settled during the settlement period specified in the Individual Agreement.

Settlement reports are generated on a transaction acceptance account level or by account groups (a group is when acceptance accounts are grouped for settlement purposes) after each closed settlement period. They are sent to the email addresses or SFTP server previously approved by the partner, on the day when the payment is due. Furthermore, after a successful login, the reports can also be downloaded from the [Partner Back Office](#) interface, from the **Accounting → Transfers → Generated transfers** menu.

Report formats developed by SimplePay:

- **SimplePay flat** (detailed specification in [Chapter 1.2.1](#))
- **SimplePay IC++** (detailed specification in [Chapter 1.2.1](#))
- **SimplePay IC++ ONUS** (detailed specification in [Chapter 1.2.1](#))
- **Extended SimplePay flat** (detailed specification in [Chapter 1.2.2](#))
- **Extended SimplePay IC++** (detailed specification in [Chapter 1.2.2](#))
- **Extended SimplePay IC++ ONUS** (detailed specification in [Chapter 1.2.2](#))

Report formats adopted from OTP Bank Plc:

- **CSV** (new uniform report format introduced by OTP Bank on 12.09.2022, detailed specification in [Chapter 1.2.3](#))
- **CSVD*** (detailed specification in [Chapter 1.2.4](#))
- **K01D*** (detailed specification in [Chapter 1.2.5](#))

- **K04D*** (detailed specification in [Chapter 1.2.6](#))
- **K05D*** (detailed specification in [Chapter 1.2.7](#))

*** Old, no longer used report format, discontinued at OTP Bank Plc as of 12.09.2022. SimplePay Plc's system is able to provide these formats to its partners for an indefinite period of time.**

With the introduction of Wire transfer ('Instant Transfer' service), 'Payment request', Payment with touch ('Telephone POS') service, and the "qvik" payment the above report formats have been supplemented with new transaction types and thus provide additional values.

Bank card payments made at a POS terminal, along with online bank card payments, are categorized under the bank card payment type.

When the DCC service is used, the payment type is 'Bank card DCC'.

Instant Transfer, Payment request and qvik transactions are a type of transactions that are settled by bank transfer, and therefore data related to bank card usage are not applicable for these transaction types.

The qvik transfer service is also available with split pricing, similar to the IC++ pricing for card transactions. In this case, the gross SimplePay commission for qvik transactions is split and appears in the same columns as the costs for card transactions under the IC++ pricing.

Instant Transfer, Payment request, qvik payment and Telephone POS transactions have the following common features in terms of acceptance and settlement:

- **Instant Transfer, Payment request, qvik payment and Telephone POS transactions are currently only available in HUF, while online debit card transactions are accepted in all three currencies.**
-
- **Instant Transfer, Payment request, qvik payment and Telephone POS transactions are included in the same settlement file as card transactions, therefore settled and invoiced to the partner at the same time.**
-
- **Instant Transfer, Payment request, qvik payment and Telephone POS transactions are refundable, and therefore they also have a refund (deduction) property, which is also included in the settlement report with a negative sign.**

In the settlement and invoice reports, a clear distinction can be made between various payment methods including online bank card transactions, bank card transactions through the POS terminal, physical card payment with (Telephone POS), wire transfers (Instant Transfer), Payment request payments and qvik payment, which are explained in the rest of this document.

1.2.1. SimplePay flat, SimplePay IC++ and SimplePay IC++ ONUS report formats

The 'SimplePay flat', the 'SimplePay IC++', and the 'SimplePay IC++ ONUS' report formats are electronic analytics in semicolon-separated .csv format, which serve as transaction-level justifications for partner payments transferred by SimplePay Plc.

The following reports differ from the 'SimplePay flat' report format as follows:

- The 'SimplePay IC++' report format differs in 3 columns, as the IC++ format also includes details about the fees charged on card or qvik transactions (Interchange Fee/ Paying Side Contribution, Card Scheme Fee/ Service fee, Merchant Commission).
- The 'SimplePay IC++ ONUS' report format differs in 4 columns because it includes an additional column for ONUS transaction Processing Fee, supplementing the breakdown of various charges (Interchange Fee/ Paying Side Contribution, Card Scheme Fee/ Service fee, Merchant Commission) incurred by card or qvik transactions listed in the previous point.

Differences are indicated by an * in the description and specification tables below:

* The columns 'Interchange fee / Payer contribution', 'Card scheme fee / Service fee' and 'Merchant commission' are only included in the 'SimplePay IC++' and 'SimplePay IC++ ONUS' report formats, while the 'ONUS transaction Processing Fee' column is exclusively included in the 'SimplePay IC++ ONUS' report format but these columns are filled with 0 values in case of a non-IC++ pricing, i.e. in case of simple or tiered pricing.

The 'SimplePay flat', the 'SimplePay IC++' and the 'SimplePay IC++ ONUS' report formats contain the following data:

- Transaction status
- Payment type
- SimplePay transaction ID
- Merchant transaction ID
- Transaction date
- Transaction fulfillment date
- Currency
- SimplePay's gross commission on the transaction (which in the case of broken down IC++ pricing is made up of the value of the following 3 or 4 fields)
 - Gross interchange fee/paying side contribution applied to the transaction*
 - Gross ONUS transaction processing fee applied to the transaction*
 - Gross card scheme fee/service fee applied to the transaction*
 - Gross merchant commission applied to the transaction*
- Gross amount of the transaction
- Transaction amount deducted with commission
- Merchant data
 - Partner's name (company name)
 - Account name (service establishment name on payment page)
 - Account URL
- Customer
 - Customer's name
 - Customer's email address

Specifications of 'SimplePay flat', 'SimplePay IC++' and 'SimplePay IC++ ONUS' report formats in details:

1. **Transaction status:** text type field, which may contain the following transaction statuses:
 - COMPLETED
 - REFUND
 - PARTNER PROGRAM

2. **Payment type:** text type field, which may contain the following payment options:
 - Bank card
 - Bank card DCC
 - Contactless payment*
 - Instant transfer*
 - Request to pay*
 - qvik*

Bank card payments made at the POS terminal, along with online bank card payments, are categorized under the bank card payment type.

When the DCC service is used, the payment type is 'Bank card DCC'.

*** Contactless payment, Instant Transfer, Request to pay and qvik transactions are included in the same settlement file as online or POS terminal bank card transactions, therefore settled and invoiced to the partner at the same time.**

3. **SimplePay Transaction ID:** a numeric field containing a 9-digit unique ID generated by the SimplePay system.
4. **Merchant Transaction ID:** an alphanumeric field (may include hyphens) transmitted by the partner to the SimplePay system, containing the unique ID of the payment transaction. Each transaction has a unique merchant transaction ID. Exceptions are refund transactions, as the original merchant transaction ID and the corresponding refund transaction ID are the same.
5. **Transaction date:** YYYY-MM-DD HH:MM:SS date type field, which indicates the date and time when the customer initiated the bank card or bank transfer transaction. E.g.: 2022-08-03 14:19:30
6. **Transaction fulfillment date:** YYYY-MM-DD HH:MM:SS date type field, which indicates the date and time of the successful bank card payment or Instant Transfer transaction. E.g.: 2022-08-07 11:24:37
7. **Currency:** a text field indicating the currency of the transaction amount, which may be one of the following, depending on the partner account's accepted currencies:
 - HUF*
 - EUR
 - USD

* Instant Transfer, Payment request, qvik and Telephone POS transactions are currently only available in HUF, while online and POS terminal bank card transactions may also be accepted in all three currencies by the partner.

8. **Commission:** A numeric field rounded to 2 decimal places (2 decimal places displayed in case of HUF currency, but rounded to a whole number), which shows the amount of the gross commission charged for the given transaction, including the fees related to the card use (Interchange fee, Card scheme fee, Merchant Commission). In the case of IC++ pricing, this commission is the total commission charged for the transaction calculated as the sum of the following 3 fees. The transaction commission can be either 0 or a positive number.
9. **Interchange fee / Payer contribution)*:** A numeric field rounded to 2 decimal places (2 decimal places displayed in case of HUF currency, but rounded to a whole number), which is one of the components of the charges that may be associated with the use of the card or may be associated with the completion of a qvik transaction. Fee dependent on the card companies and type of bank card or on the qvik transaction fees. The gross amount of the interchange/paying side contribution can be either 0 or a positive number. **In case of Instant Transfer and Payment request transactions, this field is not applicable, therefore its value is 0.**
10. **ONUS transaction processing fee)*:** A numeric field rounded to 2 decimal places (2 decimal places displayed in case of HUF currency, but rounded to a whole number), which is one of the components of the charges that may be associated with the use of the Telephone POS, online and POS terminal bank card services. The gross amount of ONUS processing fee can be either 0 or a positive number. **In case of Instant Transfer, Payment request, and qvik transactions, this field is not applicable, therefore its value is 0.**
11. **Card scheme fee / Service fee)*:** A numeric field rounded to 2 decimal places (2 decimal places displayed in case of HUF currency, but rounded to a whole number), which is one of the components of the charges that may be associated with the use of the card or may be associated with the completion of a qvik transaction. Fee dependent on the card acceptor bank and type of bank card or on the qvik transaction fees. The gross amount of the card scheme fee/service fee can be either 0 or a positive number. **In case of Instant Transfer and Payment request transactions, this field is not applicable, therefore its value is 0.**
12. **Merchant Commission)*:** A numeric field rounded to 2 decimal places (2 decimal places displayed in case of HUF currency, but rounded to a whole number), which shows the amount of the gross commission charged for the SimplePay service used for the given transaction and adjusted with the DCC discount, as defined in the Individual Agreement. The merchant commission can be either 0 or a positive number.
13. **Transaction amount:** A numeric field rounded to 2 decimal places (2 decimal places displayed in case of HUF currency, but rounded to a whole number), representing the gross amount of the product or service purchased by the customer, i.e. the gross

amount of the transaction initiated. In case of a refund transactions or a discount refunded within the framework of an OTP partner programme, this amount is negative.

- 14. Transaction amount deducted with commissio:** A numeric field rounded to 2 decimal places (2 decimal places displayed in case of HUF currency, but rounded to a whole number), representing the amount of the transactions decreased by gross commission ('Transaction commission') or the amount of the transactions decreased by OTP partner programme discount, i.e. the amount due to the partner. The amount decreased by commission can be either a positive or a negative number.
- 15. Partner:** the text field containing the name of the contracting party using the SimplePay service, as specified in the Individual Contract.
- 16. Account name:** the name of the service establishment or the website/mobile application payment page associated with the contracting party using the SimplePay service as specified in the Individual Contract, in a text field.
- 17. Account URL:** the service establishment or the website address associated with the contracting party as specified in the Individual Contract, in a text field.
- 18. Customer:** a text field containing the name of the customer associated with the transaction that settled the payment for the product or service sold by the partner.
- 19. Email address:** a text field containing the email address of the customer associated with the transaction that settled the payment for the product or service sold by the partner.

Specifications of 'SimplePay flat', 'SimplePay IC++' and 'SimplePay IC++ ONUS' report formats:

Header, description	Data field type	Data field length	Specification
Transaction status	Text	Max. 15	Status of SimplePay transaction
Payment type	Text	Max. 19	Type of SimplePay transaction
SimplePay Transaction ID	numeric	Currently fixed at 9	SimplePay internal transaction identifier
Merchant Transaction ID	alphanumeric	Max. 64	merchant transaction ID
Transaction date	date	Fixed at 19	date of transaction (Public date)
Transaction fulfillment date	date	Fixed at 19	transaction completion date (Finish date)
Currency	text	Fixed at 3	transaction acceptance currency
Commission	numeric	Max. 15	gross transaction commission in the acceptance currency
Interchange fee / Payer contribution*	numeric	Max. 15	gross interchange fee charged on card transaction or gross paying side contribution charged on qvik transaction
ONUS tranzakció feldolgozási díj*	numeric	Max. 15	gross ONUS transaction processing fee charged on transaction

Card scheme fee / Service fee*	numeric	Max. 15	gross card scheme fee charged on card transaction or gross service fee charged on qvik transaction
Merchant commission*	numeric	Max. 15	gross merchant commission adjusted by the DCC discount payable to SimplePay
Transaction amount	numeric	Max. 15	gross value of the transaction in the acceptance currency
Transaction amount deducted with commission	numeric	Max. 15	gross transaction value deducted with transaction commission in the acceptance currency
Partner	text	Max. 100	partner's name (company name)
Account name	text	Max. 255	partner payment page (account) name
Account URL	text	Max. 255	URL or application associated with online acceptance
Customer	text	Max. 255	customer's name
E-mail address	text	Max. 200	customer's email address

*The columns 'Interchange fee / Payer contribution', 'Card scheme fee / Service fee' and 'Merchant commission' are only included in the 'SimplePay IC++' and 'SimplePay IC++ ONUS' report formats, while the 'ONUS tranzakció feldolgozási díj' column is exclusively included in the 'SimplePay IC++ ONUS' report format but these columns are filled with 0 values in case of a non-IC++ pricing, i.e. in case of simple or tiered pricing.

1.3 Extended SimplePay flat, Extended SimplePay IC++ and Extended SimplePay IC++ ONUS report formats

The 'Extended SimplePay flat', the 'Extended SimplePay IC++' and the 'Extended SimplePay IC++ ONUS' report formats are electronic analytics in semicolon-separated .csv format, which serve as transaction-level justifications for partner payouts transferred by SimplePay Plc.

The following reports differ from the 'Extended SimplePay flat' report format as follows:

- The 'Extended SimplePay IC++' report format differs in 3 columns, as the IC++ format also includes details about the fees charged on card or qvik transactions (Interchange Fee/Paying Side Contribution, Card Scheme Fee/Service fee, Merchant Commission).
- The 'Extended SimplePay IC++ ONUS' report format differs in 4 columns because it includes an additional column for ONUS transaction Processing Fee, supplementing the breakdown of various charges (Interchange Fee/Paying Side Contribution, Card Scheme Fee/Service fee, Merchant Commission) incurred by card or qvik transactions listed in the previous point.

Differences are indicated by an * in the description and specification tables below:

***The columns 'Interchange fee / Payer contribution', 'Card scheme fee / Service fee' and 'Merchant commission' are only included in the 'Extended SimplePay IC++' and 'Extended SimplePay IC++ ONUS' report formats, while the 'ONUS transaction Processing Fee' column is exclusively included in the 'Extended SimplePay IC++ ONUS' report format but these columns are filled with 0 values in case of a non-IC++ pricing, i.e. in case of simple or tiered pricing.**

The 'Extended SimplePay flat', the 'Extended SimplePay IC++' and the 'Extended SimplePay IC++ ONUS' report formats contain the following data:

- Transaction status
- Payment type
- SimplePay transaction ID
- Merchant transaction ID
- Transaction date
- Transaction fulfillment date
- Currency
- SimplePay's gross commission on the transaction (which in the case of broken down IC++ pricing is made up of the value of the following 3 or 4 fields)
 - Gross interchange fee/ paying side contribution applied to the transaction*
 - Gross ONUS transaction processing fee applied to the transaction*
 - Gross card scheme fee/ service fee applied to the transaction*
 - Gross merchant commission applied to the transaction*
- Gross amount of the transaction
- Transaction amount deducted with commission
- Merchant
 - Partner's name (company name)
 - Account name (service establishment name on payment page)

- Account URL
- Customer
 - Customer's name
 - Customer's email address
- Data associated with Telephone POS service
 - External Service Provider Terminal ID
 - Device identifier
 - Device name
 - POS ID
 - Product name

Specifications of the 'Extended SimplePay flat', the 'Extended SimplePay IC++' and the 'Extended SimplePay IC++ ONUS' report formats in details:

1. **Transaction status:** text type field, which may contain the following transaction statuses:
 - COMPLETED
 - REFUND
 - PARTNER PROGRAM

2. **Payment type:** text type field, which may contain the following payment options:

- Bank card
- Bank card DCC
- Contactless payment*
- Instant transfer*
- Request to pay*
- qvik*

* **Contactless payment, Instant Transfer, Request to pay and qvik transactions are included in the same settlement file as online or POS terminal bank card transactions, therefore settled and invoiced to the partner at the same time.**

3. **SimplePay transaction ID:** a numeric field containing a 9-digit unique ID generated by the SimplePay system.
4. **Merchant transaction ID:** an alphanumeric field (may include hyphens) transmitted by the partner to the SimplePay system, containing the unique ID of the payment transaction. Each transaction has a unique merchant transaction ID. Exceptions are refund transactions, as the original merchant transaction ID and the corresponding refund transaction ID are the same.
5. **Transaction date:** YYYY-MM-DD HH:MM:SS date type field, which indicates the date and time when the customer initiated the bank card or bank transfer transaction. E.g.: 2022-08-03 14:19:30
6. **Transaction fulfillment date:** YYYY-MM-DD HH:MM:SS date type field, which indicates the date and time of the successful bank card payment or Instant Transfer transaction. E.g.: 2022-08-07 11:24:37
7. **Currency:** a text field indicating the currency of the transaction amount, which may be one of the following, depending on the partner account's accepted currencies:
 - HUF*
 - EUR
 - USD

* **Instant Transfer, Payment request, qvik and Telephone POS transactions are currently only available in HUF, while online and POS terminal bank card transactions may also be accepted in all three currencies by the partner.**

8. **Commission:** A numeric field rounded to 2 decimal places (2 decimal places displayed in case of HUF currency, but rounded to a whole number), which shows the amount of the gross commission charged for the given transaction, including the fees related to the card use (Interchange fee, Card scheme fee, Merchant Commission). In the case

of IC++ pricing, this commission is the total commission charged for the transaction calculated as the sum of the following 3 fees. The transaction commission can be either 0 or a positive number.

- 9. Interchange fee/ Paying side contribution***: A numeric field rounded to 2 decimal places (2 decimal places displayed in case of HUF currency, but rounded to a whole number), which is one of the components of the charges that may be associated with the use of the card or may be associated with the completion of a qvik transaction. Fee dependent on the card companies and type of bank card or on the qvik transaction fees. The gross amount of the interchange fee/ paying side contribution can be either 0 or a positive number. **In case of Instant transfer and Payment request transactions, this field is not applicable, therefore its value is 0.**
- 10. ONUS transaction processing fee***: A numeric field rounded to 2 decimal places (2 decimal places displayed in case of HUF currency, but rounded to a whole number), which is one of the components of the charges that may be associated with the use of the Telephone POS, online and POS terminal bank card services. The gross amount of ONUS processing fee can be either 0 or a positive number. **In case of Instant Transfer, Payment request and qvik transactions, this field is not applicable, therefore its value is 0.**
- 11. Card scheme fee/ Service fee***: A numeric field rounded to 2 decimal places (2 decimal places displayed in case of HUF currency, but rounded to a whole number), which is one of the components of the charges that may be associated with the use of the card or may be associated with the completion of a qvik transaction. Fee dependent on the card acceptor bank and type of bank card or on the qvik transaction fees. The gross amount of the card scheme fee or the card scheme fee/service fee can be either 0 or a positive number. **In case of Instant Transfer and Payment request transactions, this field is not applicable, therefore its value is 0.**
- 12. Merchant Commission***: A numeric field rounded to 2 decimal places (2 decimal places displayed in case of HUF currency, but rounded to a whole number), which shows the amount of the gross commission charged for the SimplePay service used for the given transaction and adjusted with the DCC discount, as defined in the Individual Agreement. The merchant commission can be either 0 or a positive number.
- 13. Transaction amount**: A numeric field rounded to 2 decimal places (2 decimal places displayed in case of HUF currency, but rounded to a whole number), representing the gross amount of the product or service purchased by the customer, i.e. the gross amount of the transaction initiated. In case of a refund transactions or a discount refunded within the framework of an OTP partner programme, this amount is negative.
- 14. Transaction amount deducted with commission**: A numeric field rounded to 2 decimal places (2 decimal places displayed in case of HUF currency, but rounded to a whole number), representing the amount of the transactions decreased by the gross commission ('Transaction commission') or the amount of the transactions decreased by the OTP partner programme discount, i.e. the amount due to the partner. The amount decreased by the commission can be either a positive or a negative number.

- 15. Partner :** the text field containing the name of the contracting party using the SimplePay service, as specified in the Individual Contract.
- 16. Account name:** the name of the service establishment or the website/mobile application payment page associated with the contracting party using the SimplePay service as specified in the Individual Contract, in a text field.
- 17. Account URL:** the service establishment or the website address associated with the contracting party as specified in the Individual Contract, in a text field.
- 18. Customer:** a text field containing the name of the customer associated with the transaction that settled the payment for the product or service sold by the partner.
- 19. Email address:** a text field containing the email address of the customer associated with the transaction that settled the payment for the product or service sold by the partner.
- 20. External Service Provider Terminal ID:** a text field containing the unique ID of the registered terminal, which is created after the successful completion of the terminal registration process required to activate the Telephone POS function for the device logged into the partner account. The ID is generated when the device is connected to the terminal (POS).
- 21. Device identifier:** also known as Device ID. A long type field, which contains a unique ID generated by the SimplePay system, which is generated after the successful login to the SimpleBusiness application from the given device.
- 22. Device name:** a text field, the value of which is the device name specified by the partner, and is unique for each account, therefore device names under one account cannot be identical. The devices are named when a login to SimpleBusiness occurs.
- 23. POS ID:** a text field with eight characters (consisting of 7 numeric characters and one letter). A unique ID generated by the acquiring bank's system, which is the POS endpoint identifier required for the Telephone POS function.
- 24. Product name:** a text field, which is populated when the partner records a product name in the application when initiating the transaction (or in case of an integrated solution, when submitting the transaction).

Specifications of 'Extended SimplePay flat', 'Extended SimplePay IC++' and 'Extended SimplePay IC++ ONUS' formats:

Header, description	Data field type	Data field length	Specification
Transaction status	Text	Max. 15	Status of SimplePay transaction
Payment type	Text	Max. 19	Type of SimplePay transaction
SimplePay Transaction ID	numeric	Currently fixed at 9	SimplePay internal transaction identifier
Merchant Transaction ID	alphanumeric	Max. 64	merchant transaction ID
Transaction date	date	Fixed at 19	date of transaction (Public date)
Transaction fulfillment date	date	Fixed at 19	transaction completion date (Finish date)
Currency	text	Fixed at 3	transaction acceptance currency
Commission	numeric	Max. 15	gross transaction commission in the acceptance currency
Interchange fee / Payer contribution*	numeric	Max. 15	gross interchange fee charged on card transaction or gross paying side contribution charged on qvik transaction
ONUS tranzakció feldolgozási díj*	numeric	Max. 15	gross ONUS transaction processing fee charged on transaction

Card scheme fee / Service fee*	numeric	Max. 15	gross card scheme fee charged on card transaction or service fee charged on qvik transaction
Merchant commission*	numeric	Max. 15	gross merchant commission adjusted by the DCC discount payable to SimplePay
Transaction amount	numeric	Max. 15	gross value of the transaction in the acceptance currency
Transaction amount deducted with commission	numeric	Max. 15	gross transaction value deducted with transaction commission in the acceptance currency
Partner	text	Max. 100	partner's name (company name)
Account name	text	Max. 255	partner payment page (account) name
Account URL	text	Max. 255	URL or application associated with online acceptance
Customer	text	Max. 255	customer's name
E-mail address	text	Max. 200	customer's email address
External Service Provider Terminal ID	text	Max. 30	unique ID of registered terminal
Device identifier	long type	The max. value of long: 9 223 372 036 854 77 5 807	The unique device ID generated by the SimplePay system

Device name	text	Max. 64	a unique device name that can be specified by the partner
POS ID	text	Max. 64	the POS endpoint ID required for the Telephone POS function
Product name	text	Max. 200	the product name specified by the partner

*The columns 'Interchange fee / Payer contribution', 'Card scheme fee / Service fee' and 'Merchant commission' are only included in the 'SimplePay IC++' and 'SimplePay IC++ ONUS' report formats, while the 'ONUS tranzakció feldolgozási díj' column is exclusively included in the 'SimplePay IC++ ONUS' report format but these columns are filled with 0 values in case of a non-IC++ pricing, i.e. in case of simple or tiered pricing.

1.2.2. CSV report format

File format: csv (semicolon (;) separated)

Records:

Head record: One record.

Data records: One record per transaction.

Closing record: One record.

Amount fields:

In the currency of the settlement (HUF, EUR, USD).

Decimals according to the currency of the settlement:

- 0 decimals in case of HUF,
- 2 decimals in case of EUR,
- 2 decimals in case of USD,

Decimal places separated by a comma

There is no plus/minus sign in case of an original purchase transaction (positive amount).

In case of a product return (refund) a '-' sign (for a negative amount).

In this report format Instant Transfer, Payment request, qvik and Telephone POS transactions are only applicable if the accepted currency is HUF.

Structure:

Description: The name of the data field

Max: The maximum length of the data field

Specification: A short description of the data field

Note:

A new, standardised report format introduced on 12.09.2022, which has two new columns and the data content of the BINF values has also changed.

Head record

Description	Max	Specification
Constant 'FH'	2	'FH' - File Header
Merchant's code	24	The unique ID number issued by SimplePay
Merchant's name	50	Partner's company name
File number	10	Date and format of settlement: yyyy.mm.dd
Date	10	Format of file and date of file creation: yyyy.mm.dd
Merchant's account number	30	Format: 99999999-99999999-99999999, 99999999-99999999 or HU99999999999999999999999999999999 fixed at 30-character length
Currency of the settlement	3	'HUF', 'EUR', 'USD'

Data record

Description	Max	Specification
SimplePay ID	16	The unique transaction ID issued by SimplePay
Merchant ID	64	An alphanumeric ID that identifies the acceptance account in SimplePay's system
Authorisation code	6	A unique ID generated by the authorization system, not applicable in case of Instant Transfer, Payment request and qvik, in which case the value is 000000
Date of transaction	8	Format: yyyyymmdd
Time of transaction	6	Format: hhmmss
Card number	19	A card number with a maximum of 19 digits The first 6 and the last 4 digits are displayed, the other digits are replaced by '*'. Not applicable in case of Instant Transfer, Payment request and qvik, in which case the value is 0000000000000000
Amount of the transaction	10	The gross amount of the transaction in the settlement currency
Interchange fee/ Paying side contribution	8	The gross amount of the interchange fee or paying side contribution in the settlement currency. Not applicable in the case of Instant Transfer and Payment request, in which case the value is 0.00
Card scheme fee/ Service fee	8	The gross amount of the card scheme fee or service fee in the settlement currency. Not applicable in the case of Instant Transfer and Payment request, in which case the value is 0.00
Merchant Commission	8	Gross merchant commission adjusted by the DCC discount payable to SimplePay
Gross Commission	8	The gross amount of the commission in the settlement currency
Net amount	10	= (gross amount of transaction – gross commission) in the settlement currency
Transaction indicator	1	Value: In case of Cashback transactions: 'K' In case of DCC transactions: 'D' In case of Partner programme transactions: 'P' In case of Partner discount transactions: 'R' In case of Instant Transfer transactions: 'I' In case of Payment request transactions: 'F' In case of physical card (Telephone POS) transactions: 'S' In case of qvik transactions: 'Q' In other cases: ' ' (space)
Name of business	50	The name of the partner account
External unique ID	32	Transaction ID generated by the merchant and sent to SimplePay
BINF	2	Card type (possible values: alphanumeric, more details in the ' Annex '), Not applicable in case of Instant Transfer, Payment request and qvik, in which case the value is 00
Interchange programme code	20	Interchange fee programme code (if exists, otherwise the field will be blank)
The day the analytics was created	10	Format: yyyy.mm.dd

Closing record

Description	Max	Specification
Constant 'FT'	2	'FT' - File Trailer
Merchant's code	24	The unique ID number issued by SimplePay
Date	10	Format of file and date of file creation: yyyy.mm.dd
Number of records processed	8	Number of transaction rows in the settlement file
Total settlement amount	10	The total of the net amounts in the transaction rows of the file in the settlement currency

1.2.3. CSVD report format

Code page: ISO-8859-2

File format: csv (semicolon ';' separated)

Records:

- Head record:** One record.
- Data records:** One record per transaction.
- Closing record:** One record.

Amount fields:

In the currency of the settlement (HUF, EUR, USD), with two decimal places.

In this report format Instant Transfer, Payment request, qvik and physical card (Telephone POS) transactions are only applicable if the accepted currency is HUF.

There is no plus/minus sign in case of an original purchase transaction (positive amount).

In case of a product return (refund) a '-' sign (for a negative amount).

Structure:

Description:	The name of the data field
Max:	The maximum length of the data field
Specification:	A short description of the data field

Note: From the analytics until 09.11.2015 with the ECSV code, the format has been extended with the transaction fee columns. **The format phased out at OTP Bank as of 12.09.2022, but SimplePay is able to provide it to its partners for an indefinite period of time.**

Head record

Description	Max	Specification
Constant 'FH'	2	'FH' - File Header
Merchant's code	9	The unique ID number issued by SimplePay
Merchant's name	30	Partner's company name
File number	10	Date and format of settlement: yyyy.mm.dd
Date	10	Format of file and date of file creation: yyyy.mm.dd
Merchant's account number	30	Format: 99999999-99999999-99999999, 99999999-99999999 or HU999999999999999999999999 fixed at 30-character length
Currency of the settlement	3	'HUF', 'EUR', 'USD'

Data record

Description	Max	Specification
SimplePay ID	16	The unique transaction ID issued by SimplePay
Merchant ID	64	An alphanumeric ID that identifies the acceptance account in SimplePay's system
Authorisation code	6	A unique ID generated by the authorization system, not applicable in case of Instant Transfer, Payment request and qvik, in which case the value is 000000
Date of transaction	8	Format: yyyymmdd
Time of transaction	6	Format: hhmmss
Card number	19	A card number with a maximum of 19 digits The first 6 and the last 4 digits are displayed, the other digits are replaced by '*'. Not applicable in case of Instant Transfer, Payment request and qvik, in which case the value is 0000000000000000
Amount of the transaction	10	The gross amount of the transaction in the settlement currency
Interchange fee/ Paying side contribution	8	The gross amount of the interchange fee or the paying side contribution in the settlement currency. Not applicable in the case of Instant Transfer and Payment request, in which case the value is 0.00
Card scheme fee/ Service fee	8	The gross amount of the card scheme fee or the service fee in the settlement currency. Not applicable in the case of Instant Transfer and Payment request, in which case the value is 0.00
Merchant Commission	8	Gross merchant commission adjusted by the DCC discount payable to SimplePay
Gross Commission	8	The gross amount of the commission in the settlement currency
Net amount	10	= (gross amount of transaction – gross commission) in the settlement currency
Transaction indicator	1	Value: In case of Cashback transactions: 'K' In case of DCC transactions: 'D' In case of Partner programme transactions: 'P' In case of Partner discount transactions: 'R' In case of Instant Transfer transactions: 'I' In case of Payment request transactions: 'F' In case of physical card (Telephone POS) transactions: 'S' In case of qvik transactions: 'Q' In other cases: ' ' (space)
Name of business	30	The name of the partner account
External unique ID	32	Transaction ID generated by the merchant and sent to SimplePay
BINF	2	Card type (possible values in the ' Annex '), Not applicable in case of Instant Transfer, Payment request and qvik, in which case the value is 00

Closing record

Description	Max	Specification
Constant 'FT'	2	'FT' - File Trailer
Merchant's code	9	The unique ID number issued by SimplePay
Date	10	Format of file and date of file creation: yyyy.mm.dd
Number of records processed	8	Number of transaction rows in the settlement file
Total settlement amount	10	The total of the net amounts in the transaction rows of the file in the settlement currency

1.2.4. K01D report format

Code page: ISO-8859-2

'char' type fields: Left aligned fields populated with spaces from the right (exceptions marked at the specific fields)

'num' type fields: Right aligned fields populated with 0s from the left

Records:

Head record: One record.

Data records: One record per transaction.

Closing record: One record.

Amount fields:

In the currency of the settlement (HUF) without decimal places.

In this report format Instant Transfer, Payment request, qvik and physical card (Telephone POS) transactions are applicable.

In case of a positive amount, a space will replace the sign. A negative amount is preceded by a '-' sign.

In data records, the length of the amount fields (including the preceding space and sign field): 15 characters

Note:

From the analytics until 09.11.2015 with K001, SHEL, TESC, TOBA, WEBS codes, the format has been extended with the transaction fee columns.

The format phased out at OTP Bank as of 12.09.2022, but SimplePay is able to provide it to its partners for an indefinite period of time.

1.3. Commission invoices and invoice reports

An invoice authenticated with an e-signature is issued for the SimplePay commission charged for the given month's transactions, which is sent to the email address(es) provided by the partner once a month until the 15th day following the reference month. SimplePay issues and sends the invoices in an electronic format to the partners (unless otherwise stated in the Individual Agreement).

The invoice is issued in the same currency in which the transactions were accepted (this may not necessarily be the same as the currency of the payout). The currency of the transactions and invoices, as well as the currency of the payments, are also specified in the Individual Contract by the partners. **The invoice issued does not require financial settlement, as the commissions have already been deducted from the partner's payments** (unless otherwise agreed in the Individual Contract).

Commission invoices are generated at the transaction acceptance account or or by account groups (a group is when acceptance accounts are grouped for settlement purposes) level after each complete month. After a successful login, the invoices can also be downloaded from the [Partner Back Office](#) interface, from the **Accounting → Invoices** menu.

The monthly commission invoices sent out are always accompanied by an invoice report, available in the following formats:

- **SimplePay flat** (detailed specification in [Chapter 1.3.1](#))
- **SimplePay IC++** (detailed specification in [Chapter 1.3.1](#))
- **SimplePay IC++ ONUS** (detailed specification in [Chapter 1.3.1](#))
- **Extended SimplePay flat** (detailed specification in [Chapter 1.3.2](#))
- **Extended SimplePay IC++** (detailed specification in [Chapter 1.3.2](#))
- **Extended SimplePay IC++ ONUS** (detailed specification in [Chapter 1.3.2](#))
- **CSV** (fully identical with the format and data content of the settlement analytics specified in [Chapter 1.2.3](#) but during invoicing, the report includes the transactions invoiced)
- **CSVD** (fully identical with the format and data content of the settlement analytics specified in [Chapter 1.2.4](#) but during invoicing, the report includes the transactions invoiced)
- **K01D** (fully identical with the format and data content of the settlement analytics specified in [Chapter 1.2.5](#) but during invoicing, the report includes the transactions invoiced)
- **K04D** (fully identical with the format and data content of the settlement analytics specified in [Chapter 1.2.6](#) but during invoicing, the report includes the transactions invoiced)
- **K05D** (fully identical with the format and data content of the settlement analytics specified in [Chapter 1.2.7](#) but during invoicing, the report includes the transactions invoiced)

1.4 SimplePay flat, SimplePay IC++ and SimplePay IC++ ONUS invoice report formats

The 'SimplePay flat', the 'SimplePay IC++' and the 'SimplePay IC++ ONUS' invoice reports are electronic analytics in semicolon-separated .csv format, which serve as transaction-level justifications for transaction fees charged by SimplePay Plc.

The following reports differ from the 'SimplePay flat' report format as follows:

- **The 'SimplePay IC++' report format** differs in 3 columns, as the IC++ format also includes details about the fees charged on card or qvik transactions (Interchange Fee/ Paying Side Contribution, Card Scheme Fee/ Service fee, Merchant Commission).
- **The 'SimplePay IC++ ONUS' report format** differs in 4 columns because it includes an additional column for ONUS transaction Processing Fee, supplementing the breakdown of various charges (Interchange Fee/ Paying Side Contribution, Card Scheme Fee/ Service fee, Merchant Commission) incurred by card or qvik transactions listed in the previous point.

Differences are indicated by an * in the description and specification tables below:

*** The columns 'Interchange fee / Payer contribution', 'Card scheme fee / Service fee' and 'Merchant commission' are only included in the 'SimplePay IC++' and 'SimplePay IC++ ONUS' report formats, while the 'ONUS transaction Processing Fee' column is exclusively included in the 'SimplePay IC++ ONUS' report format but these columns are filled with 0 values in case of a non-IC++ pricing, i.e. in case of simple or tiered pricing.**

The 'SimplePay flat', the 'SimplePay IC++' and the 'SimplePay IC++ ONUS' invoice report formats include the following data:

- Transaction status
- Payment type
- SimplePay transaction ID
- Merchant transaction ID
- Transaction date
- Transaction fulfillment date
- Currency
- SimplePay's gross commission on the transaction (which in the case of broken down IC++ pricing is made up of the value of the following 3 or 4 fields)
 - Gross interchange fee/ paying side contribution applied to the transaction*
 - Gross ONUS transaction processing fee applied to the transaction*
 - Gross card scheme fee/ service fee applied to the transaction*
 - Gross merchant commission applied to the transaction*
- Gross amount of the transaction
- Transaction amount deducted with commission
- Merchant
 - Partner's name (company name)

- Account name (service establishment name on payment page)
 - Account URL
- Customer
 - Customer's name
 - Customer's email address
- Settlement details of the transaction
 - Currency of the settlement
 - Gross transaction commission in the settlement currency
 - Gross transaction amount in the settlement currency
 - Transaction amount deducted with commission in the settlement currency
- Transfer details
 - Transfer notice
 - Date of completing the transfer

Specifications of the 'SimplePay flat', the 'SimplePay IC++' and the 'SimplePay IC++ ONUS' invoice report formats in details:

1. **Transaction status:** text type field, which may contain the following transaction statuses:
 - COMPLETED
 - REFUND
 - PARTNER PROGRAM
2. **Payment type:** text type field, which may contain the following payment options:
 - Bank card
 - Bank card DCC
 - Contactless payment*
 - Instant transfer*
 - Request to pay*
 - qvik*

*** Contactless payment, Instant Transfer, Payment request and qvik transactions are included in the same settlement file as online or POS terminal bank card transactions, therefore settled and invoiced to the partner at the same time.**

3. **SimplePay transaction ID:** a numeric field containing a 9-digit unique ID generated by the SimplePay system.
4. **Merchant transaction ID:** an alphanumeric field (may include hyphens) transmitted by the partner to the SimplePay system, containing the unique ID of the payment transaction. Each transaction has a unique merchant transaction ID. Exceptions are refund transactions, as the original merchant transaction ID and the corresponding refund transaction ID are the same.
5. **Transaction date:** YYYY-MM-DD HH:MM:SS date type field, which indicates the date and time when the customer initiated the bank card or bank transfer transaction. E.g.: 2022-08-03 14:19:30
6. **Transaction fulfillment date:** YYYY-MM-DD HH:MM:SS date type field, which indicates the date and time of the successful bank card payment or Instant Transfer transaction. E.g.: 2022-08-07 11:24:37
7. **Currency:** a text field indicating the currency of the transaction amount, which may be one of the following, depending on the partner account's accepted currencies:
 - HUF*
 - EUR
 - USD

*** Instant Transfer, Payment request, qvik and contactless payment (Telephone POS) transactions are currently only available in HUF, while online and POS terminal bank card transactions may also be accepted in all three currencies by the partner.**

- 8. Commission:** A numeric field rounded to 2 decimal places (2 decimal places displayed in case of HUF currency, but rounded to a whole number), which shows the amount of the gross commission charged for the given transaction, including the fees related to the card use (Interchange fee, Card scheme fee, Merchant Commission). In the case of IC++ pricing, this commission is the total commission charged for the transaction calculated as the sum of the following 3 fees. The transaction commission can be either 0 or a positive number.
- 9. Interchange fee / Paying side contribution*:** A numeric field rounded to 2 decimal places (2 decimal places displayed in case of HUF currency, but rounded to a whole number), which is one of the components of the charges that may be associated with the use of the card or may be associated with the completion of a qvik transaction. Fee dependent on the card companies and type of bank card or on the qvik transaction fees. The gross amount of the interchange/paying side contribution can be either 0 or a positive number. **In case of Instant Transfer and Payment request transactions, this field is not applicable, therefore its value is 0.**
- 10. ONUS transaction processing fee*:** A numeric field rounded to 2 decimal places (2 decimal places displayed in case of HUF currency, but rounded to a whole number), which is one of the components of the charges that may be associated with the use of the Telephone POS, online and POS terminal bank card services. The gross amount of ONUS processing fee can be either 0 or a positive number. **In case of Instant Transfer, Payment request, and qvik transactions, this field is not applicable, therefore its value is 0.**
- 11. Card scheme fee / Service fee*:** A numeric field rounded to 2 decimal places (2 decimal places displayed in case of HUF currency, but rounded to a whole number), which is one of the components of the charges that may be associated with the use of the card or may be associated with the completion of a qvik transaction. Fee dependent on the card acceptor bank and type of bank card or on the qvik transaction fees. The gross amount of the card scheme fee/service fee can be either 0 or a positive number. **In case of Instant Transfer and Payment request transactions, this field is not applicable, therefore its value is 0.**
- 12. Merchant Commission*:** A numeric field rounded to 2 decimal places (2 decimal places displayed in case of HUF currency, but rounded to a whole number), which shows the amount of the gross commission charged for the SimplePay service used for the given transaction and adjusted with the DCC discount, as defined in the Individual Agreement. The merchant commission can be either 0 or a positive number.
- 13. Transaction amount:** A numeric field rounded to 2 decimal places (2 decimal places displayed in case of HUF currency, but rounded to a whole number), representing the gross amount of the product or service purchased by the customer, i.e. the gross amount of the transaction initiated. In case of a refund transactions or a discount refunded within the framework of an OTP partner programme, this amount is negative.

- 14. Transaction amount deducted with commission:** A numeric field rounded to 2 decimal places (2 decimal places displayed in case of HUF currency, but rounded to a whole number), representing the amount of the transactions decreased by the gross commission ('Transaction commission') or the amount of the transactions decreased by the OTP partner programme discount, i.e. the amount due to the partner. The amount decreased by the commission can be either a positive or a negative number.
- 15. Partner:** the text field containing the name of the contracting party using the SimplePay service, as specified in the Individual Contract.
- 16. Account name:** the name of the service establishment or the website/mobile application payment page associated with the contracting party using the SimplePay service as specified in the Individual Contract, in a text field.
- 17. Account URL:** the service establishment or the website address associated with the contracting party as specified in the Individual Contract, in a text field.
- 18. Customer:** a text field containing the name of the customer associated with the transaction that settled the payment for the product or service sold by the partner.
- 19. E-mail address:** a text field containing the email address of the customer associated with the transaction that settled the payment for the product or service sold by the partner.
- 20. Currency of the settlement:** a text field specifying the settlement currency of the transaction, which may be one of the following, depending on the settlement currency of the partner account:
- HUF
 - EUR
 - USD
- 21. Gross transaction commission in the settlement currency:** A numeric field rounded to 2 decimal places (2 decimal places displayed in case of HUF currency, but rounded to a whole number), which shows the amount of the gross commission charged for the given transaction, including the fees related to the card use or qvik transactions in the transaction's settlement currency. The transaction fee can be either 0 or a positive number.
- 22. Gross transaction amount in the settlement currency:** A numeric field rounded to 2 decimal places (2 decimal places displayed in case of HUF currency, but rounded to a whole number), representing the gross amount of the product or service purchased by the customer, i.e. the gross amount of the transaction initiated, in the transaction's settlement currency. In case of a refund transaction or a discount refunded within the framework of an OTP partner programme, this amount is negative.

- 23. Transaction amount deducted with commission in the settlement currency:** A numeric field rounded to 2 decimal places (2 decimal places displayed in case of HUF currency, but rounded to a whole number), representing the amount of the transactions deducted with the gross commission ('Transaction commission') or the amount of the transactions less the OTP partner programme discount, i.e. the amount due to the partner, in the transaction's settlement currency. The amount decreased by the commission can be either a positive or a negative number.
- 24. Transfer notice:** a text field, which contains the identifier starting with 'T' that appears in the transfer notice when a partner payment is initiated by SimplePay.
- 25. Date of completing the transfer:** date field of type YYYY.MM.DD, which indicates the date on which the partner payment due was made by SimplePay.

Specifications of 'SimplePay flat', 'SimplePay IC++' and 'SimplePay IC++ ONUS' invoice report formats:

Header, description	Data field type	Data field length	Specification
Transaction status	Text	Max. 15	Status of SimplePay transaction
Payment type	Text	Max. 19	Type of SimplePay transaction
SimplePay transaction ID	numeric	Currently fixed at 9	SimplePay internal transaction identifier
Merchant transaction ID	alphanumeric	Max. 64	merchant transaction ID
Transaction date	date	Fixed at 19	date of transaction (Public date)
Transaction fulfillment date	date	Fixed at 19	transaction completion date (Finish date)
Currency	text	Fixed at 3	transaction acceptance currency
Commission	numeric	Max. 15	gross transaction commission in the acceptance currency
Interchange fee / Paying side contribution*	numeric	Max. 15	gross interchange fee charged on card transaction or gross paying side contribution charged on qvik transaction
ONUS transaction processing fee*	numeric	Max. 15	gross ONUS transaction processing fee charged on transaction

Card scheme fee / Service fee*	numeric	Max. 15	gross card scheme fee charged on card transaction or gross service fee charged on qvik transaction
Merchant Commission*	numeric	Max. 15	gross merchant commission adjusted by the DCC discount payable to SimplePay
Transaction amount	numeric	Max. 15	gross value of the transaction in the acceptance currency
Transaction amount deducted with commission	numeric	Max. 15	gross transaction value deducted with transaction commission in the acceptance currency
Partner	text	Max. 100	partner's name (company name)
Account name	text	Max. 255	partner payment page (account) name
Account URL	text	Max. 255	URL or application associated with online acceptance
Customer	text	Max. 255	customer's name
E-mail address	text	Max. 200	customer's email address
Currency of the settlement	text	Fixed at 3	transaction's settlement currency
Gross transaction commission in the settlement currency	numeric	Max. 15	gross transaction commission in the settlement currency

Gross transaction amount in the settlement currency	numeric	Max. 15	gross amount of the transaction in the settlement currency
Transaction amount deducted with commission in the settlement currency	numeric	Max. 15	gross transaction value deducted with transaction commission in the settlement currency
Transfer notice	text	Max. 19	identifier starting with a 'T', which appears in the notice of the bank transfer
Date of completing the transfer	date	Fixed at 10	date of the transfer settlement

**** The columns 'Interchange fee / Payer contribution', 'Card scheme fee / Service fee' and 'Merchant commission' are only included in the 'SimplePay IC++' and 'SimplePay IC++ ONUS' report formats, while the 'ONUS tranzakció feldolgozási díj' column is exclusively included in the 'SimplePay IC++ ONUS' report format but these columns are filled with 0 values in case of a non-IC++ pricing, i.e. in case of simple or tiered pricing.**

1.5 Extended SimplePay flat, Extended SimplePay IC++ and Extended SimplePay IC++ ONUS invoice report formats

The 'Extended SimplePay flat', 'Extended SimplePay IC++' and 'Extended SimplePay IC++ ONUS' invoice details are electronic analytics in semicolon-separated .csv format, which serve as transaction-level justifications for transaction fees charged by SimplePay Plc. and contain data relevant for the physical acceptance of bank card transactions (Telephone POS), further to the formats specified in the previous chapter.

The following reports differ from the 'Extended SimplePay flat' report format as follows:

- The '**Extended SimplePay IC++**' report format differs in 3 columns, as the IC++ format also includes details about the fees charged on card and qvik transactions (Interchange Fee/Paying Side Contribution, Card Scheme Fee/Service Fee, Merchant Commission).
- The '**Extended SimplePay IC++ ONUS**' report format differs in 4 columns because it includes an additional column for ONUS transaction Processing Fee, supplementing the breakdown of various charges (Interchange Fee/Paying Side Contribution, Card Scheme Fee/Service Fee, Merchant Commission) incurred by card and qvik transactions listed in the previous point.

Differences are indicated by an * in the description and specification tables below:

*** The columns 'Interchange fee / Payer contribution', 'Card scheme fee / Service fee' and 'Merchant commission' are included in the 'Extended SimplePay IC++' and 'Extended SimplePay IC++ ONUS' report formats, while the 'ONUS transaction Processing Fee' column is exclusively included in the 'Extended SimplePay IC++ ONUS' report format but these columns are filled with 0 values in case of a non-IC++ pricing, i.e. in case of simple or tiered pricing.**

The 'Extended SimplePay flat', the 'Extended SimplePay IC++' and the 'Extended SimplePay IC++ ONUS' invoice report formats contain the following data:

- Transaction status
- Payment type
- SimplePay transaction ID
- Merchant transaction ID
- Transaction date
- Transaction fulfillment date
- Currency
- SimplePay's gross commission on the transaction (which in the case of broken down IC++ pricing is made up of the value of the following 3 or 4 fields)
 - Gross interchange fee/ paying side contribution applied to the transaction*
 - Gross ONUS transaction processing fee applied to the transaction*
 - Gross card scheme fee/ service fee applied to the transaction*
 - Gross merchant commission applied to the transaction*
- Gross amount of the transaction
- Transaction amount deducted with commission

- Merchant
 - Partner's name (company name)
 - Merchant account name (service establishment name on payment page)
 - Merchant account URL
- Customer
 - Customer's name
 - Customer's email address
- Data associated with Telephone POS service
 - External Service Provider Terminal ID
 - Device identifier
 - Device name
 - POS ID
 - Product name

Specifications of the 'Extended SimplePay flat', the 'Extended SimplePay IC++' and the 'Extended SimplePay IC++ ONUS' invoice report formats in details:

1. **Transaction status** : text type field, which may contain the following transaction statuses:
 - COMPLETED
 - REFUND
 - PARTNER PROGRAM

2. **Payment type**: text type field, which may contain the following payment options:
 - Bank card
 - Bank card DCC
 - Contactless payment*
 - Instant transfer*
 - Request to pay*
 - qvik*

*** Contactless payment, Instant Transfer, Payment request and qvik transactions are included in the same settlement file as online or POS terminal bank card transactions, therefore settled and invoiced to the partner at the same time.**

3. **SimplePay transaction ID**: a numeric field containing a 9-digit unique ID generated by the SimplePay system.
4. **Merchant transaction ID**: an alphanumeric field (may include hyphens) transmitted by the partner to the SimplePay system, containing the unique ID of the payment transaction. Each transaction has a unique merchant transaction ID. Exceptions are refund transactions, as the original merchant transaction ID and the corresponding refund transaction ID are the same.
5. **Transaction date**: YYYY-MM-DD HH:MM:SS date type field, which indicates the date and time when the customer initiated the bank card or bank transfer transaction. E.g.: 2022-08-03 14:19:30
6. **Transaction fulfillment date** : YYYY-MM-DD HH:MM:SS date type field, which indicates the date and time of the successful bank card payment or Instant Transfer transaction. E.g.: 2022-08-07 11:24:37
7. **Currency**: a text field indicating the currency of the transaction amount, which may be one of the following, depending on the partner account's accepted currencies:
 - HUF*
 - EUR
 - USD

*** Instant Transfer, Payment request, qvik and physical card (Telephone POS) transactions are currently only available in HUF, while online bank card transactions may also be accepted in all three currencies by the partner.**

- 8. Commission:** A numeric field rounded to 2 decimal places (2 decimal places displayed in case of HUF currency, but rounded to a whole number), which shows the amount of the gross commission charged for the given transaction, including the fees related to the card use (Interchange fee, Card scheme fee, Merchant Commission). In the case of IC++ pricing, this commission is the total commission charged for the transaction calculated as the sum of the following 3 fees. The transaction commission can be either 0 or a positive number.
- 9. Interchange fee/Paying side contribution*:** A numeric field rounded to 2 decimal places (2 decimal places displayed in case of HUF currency, but rounded to a whole number), which is one of the components of the charges that may be associated with the use of the card or may be associated with the completion of a qvik transaction. Fee dependent on the card companies and type of bank card or on the qvik transaction fees. The gross amount of the interchange fee/ paying side contribution can be either 0 or a positive number. **In case of Instant Transfer and Payment request transactions, this field is not applicable, therefore its value is 0.**
- 10. ONUS transaction processing fee*:** A numeric field rounded to 2 decimal places (2 decimal places displayed in case of HUF currency, but rounded to a whole number), which is one of the components of the charges that may be associated with the use of the Telephone POS, online or POS terminal bank card services. The gross amount of ONUS processing fee can be either 0 or a positive number. **In case of Instant Transfer and Payment request, qvik and online bank card transactions, this field is not applicable, therefore its value is 0.**
- 11. Card scheme fee/Service fee *:** A numeric field rounded to 2 decimal places (2 decimal places displayed in case of HUF currency, but rounded to a whole number), which is one of the components of the charges that may be associated with the use of the card or may be associated with the completion of a qvik transaction. Fee dependent on the card acceptor bank and type of bank card or on the qvik transaction fees. The gross amount of the card scheme fee/service fee can be either 0 or a positive number. **In case of Instant Transfer and Payment request transactions, this field is not applicable, therefore its value is 0.**
- 12. Merchant Commission*:** A numeric field rounded to 2 decimal places (2 decimal places displayed in case of HUF currency, but rounded to a whole number), which shows the amount of the gross commission charged for the SimplePay service used for the given transaction and adjusted with the DCC discount, as defined in the Individual Agreement. The merchant commission can be either 0 or a positive number.
- 13. Transaction amount:** A numeric field rounded to 2 decimal places (2 decimal places displayed in case of HUF currency, but rounded to a whole number), representing the gross amount of the product or service purchased by the customer, i.e. the gross amount of the transaction initiated. In case of a refund transactions or a discount refunded within the framework of an OTP partner programme, this amount is negative.

- 14. Transaction amount deducted with commission:** A numeric field rounded to 2 decimal places (2 decimal places displayed in case of HUF currency, but rounded to a whole number), representing the amount of the transactions decreased by the gross commission ('Transaction commission') or the amount of the transactions decreased by the OTP partner programme discount, i.e. the amount due to the partner. The amount decreased by the commission can be either a positive or a negative number.
- 15. Partner:** the text field containing the name of the contracting party using the SimplePay service, as specified in the Individual Contract.
- 16. Account name:** the name of the service establishment or the website/mobile application payment page associated with the contracting party using the SimplePay service as specified in the Individual Contract, in a text field.
- 17. Account URL:** the service establishment or the website address associated with the contracting party as specified in the Individual Contract, in a text field.
- 18. Customer:** a text field containing the name of the customer associated with the transaction that settled the payment for the product or service sold by the partner.
- 19. Email address:** a text field containing the email address of the customer associated with the transaction that settled the payment for the product or service sold by the partner.
- 20. External Service Provider Terminal ID:** a text field containing the unique ID of the registered terminal, which is created after the successful completion of the terminal registration process required to activate the Telephone POS function for the device logged into the partner account. The ID is generated when the device is connected to the terminal (POS).
- 21. Device identifier:** also known as Device ID. A long type field, which contains a unique ID generated by the SimplePay system, which is generated after the successful login to the SimpleBusiness application from the given device.
- 22. Device name:** a text field, the value of which is the device name specified by the partner, and is unique for each account, therefore device names under one account cannot be identical. The devices are named when a login to SimpleBusiness occurs.
- 23. POS ID:** a text field with eight characters (consisting of 7 numeric characters and one letter). A unique ID generated by the acquiring bank's system, which is the POS endpoint identifier required for the Telephone POS function.
- 24. Product name:** a text field, which is populated when the partner records a product name in the application when initiating the transaction (or in case of an integrated solution, when submitting the transaction).

Specifications of 'Extended SimplePay flat', 'Extended SimplePay IC++' and 'Extended SimplePay IC++ ONUS' formats:

Header, description	Data field type	Data field length	Specification
Transaction status	Text	Max. 15	Status of SimplePay transaction
Payment type	Text	Max. 19	Type of SimplePay transaction
SimplePay transaction ID	numeric	Currently fixed at 9	SimplePay internal transaction identifier
Merchant transaction ID	alphanumeric	Max. 64	merchant transaction ID
Transaction date	date	Fixed at 19	date of transaction (Public date)
Transaction fulfillment date	date	Fixed at 19	transaction completion date (Finish date)
Currency	text	Fixed at 3	transaction acceptance currency
Commission	numeric	Max. 15	gross transaction commission in the acceptance currency
Interchange fee / Paying side contribution*	numeric	Max. 15	gross interchange fee charged on card transaction or gross paying side contribution charged on qvik transaction
ONUS transaction processing fee*	numeric	Max. 15	gross ONUS transaction processing fee charged on transaction

Card scheme fee / Service fee*	numeric	Max. 15	gross card scheme fee charged on card transaction or gross service fee charged on qvik transaction
Merchant Commission*	numeric	Max. 15	gross merchant commission adjusted by the DCC discount payable to SimplePay
Transaction amount	numeric	Max. 15	gross value of the transaction in the acceptance currency
Transaction amount deducted with commission	numeric	Max. 15	gross transaction value deducted with transaction commission in the acceptance currency
Partner	text	Max. 100	partner's name (company name)
Account name	text	Max. 255	partner payment page (account) name
Account URL	text	Max. 255	URL or application associated with online acceptance
Customer	text	Max. 255	customer's name
E-mail address	text	Max. 200	customer's email address
External Service Provider Terminal ID	text	Max. 30	unique ID of registered terminal
Device identifier	long type	The max. value of long: 9 223 372 036 854 77 5 807	The unique device ID generated by the SimplePay system

Device name	text	Max. 64	a unique device name that can be specified by the partner
POS ID	text	Max. 64	the POS endpoint ID required for the Telephone POS function
Product name	text	Max. 200	the product name specified by the partner

* The columns 'Interchange fee / Payer contribution', 'Card scheme fee / Service fee' and 'Merchant commission' are included in the 'Extended SimplePay IC++' and 'Extended SimplePay IC++ ONUS' report formats, while the 'ONUS transaction processing fee' column is exclusively included in the 'Extended SimplePay IC++ ONUS' report format but these columns are filled with 0 values in case of a non-IC++ pricing, i.e. in case of simple or tiered pricing.

2 Support

For further information and support regarding settlement issues, please contact SimplePay Plc. at settlement@simplepay.com. **For faster processing, please provide the data identifying the problem or inquiry:**

Transactions

If you have any questions regarding transactions, please provide the SimplePay identifier of the payment. The identifier is composed of nine digits for both the Sandbox and the Live system.

Partner Payouts

If you have a question about partner payouts, please specify the name of the company or the name of its account, as well as the partner payouts or accounting period which you have questions about.

Settlement reports, analytics

If you have a question about a settlement report, please specify the name of the company or the name of its account, as well as the accounting period or settlement report ID which you have questions about.

Commissions invoices

If you have a question about a commissions invoice, please specify the name of the company or the name of its account, as well as the accounting period or invoice ID which you have questions about.

Invoice reports

If you have questions about invoice reports, please specify the name of the company or the name of its account, as well as the accounting period and the invoice report ID which you have questions about.
